START PRESENTATION

PROBLEM STATEMENT

Healthcare Inefficiency

- Long waiting times in hospitals
- Doctors overloaded with patients
- Time wasted collecting basic information
- Patients forget important symptoms

INTRODUCING MEDIFLOW AI

- AI-powered pre-consultation assistant
- Collects structured patient data
- Prepares report before doctor visit

WHY IT MATTERS

- Reduced time for diagnosis
- Doctors focus on treatment, not data collection
- Reduced frustrating patient experience

HOW IT WORKS

SYSTEM DEMO

KEY FEATURES

**Intelligent folow-up
questioning**

**Structured medical
report**

file support support

**Multi-language
support**

Chat-based interface

IMPACT

- Reduces consultation time
- Improves data accuracy
- Helps doctors make faster decision
- Better patient experience

TECHNOLOGY STACK

Frontend: HTML,
Tailwind CSS,
JavaScript

Backend:
Node.js

AI: Ilmu GLM
API (ilmu.ai)

FUTURE IMPROVEMENTS

- Integration with hospital systems
- Voice input
- Mobile app

CONCLUSION

“With MediFlow AI, healthcare becomes faster, more efficient, and more effective for both doctors and patients.”

THANK YOU AND STAY HEALTHY
